Multispacecraft observations of near-Earth IP shocks

- ~ 80 IP shocks of different origin (ICME, SIR).
- Different missions used: Cluster, Themis/Arthemis, ACE, Wind.
- Shock parameters calculated (mach numbers, local shock normals, shock strengths).
- Range of inter SC distances from 40km – 10^5 km.

Possible uses:

1. Study of shock properties at different points in space.

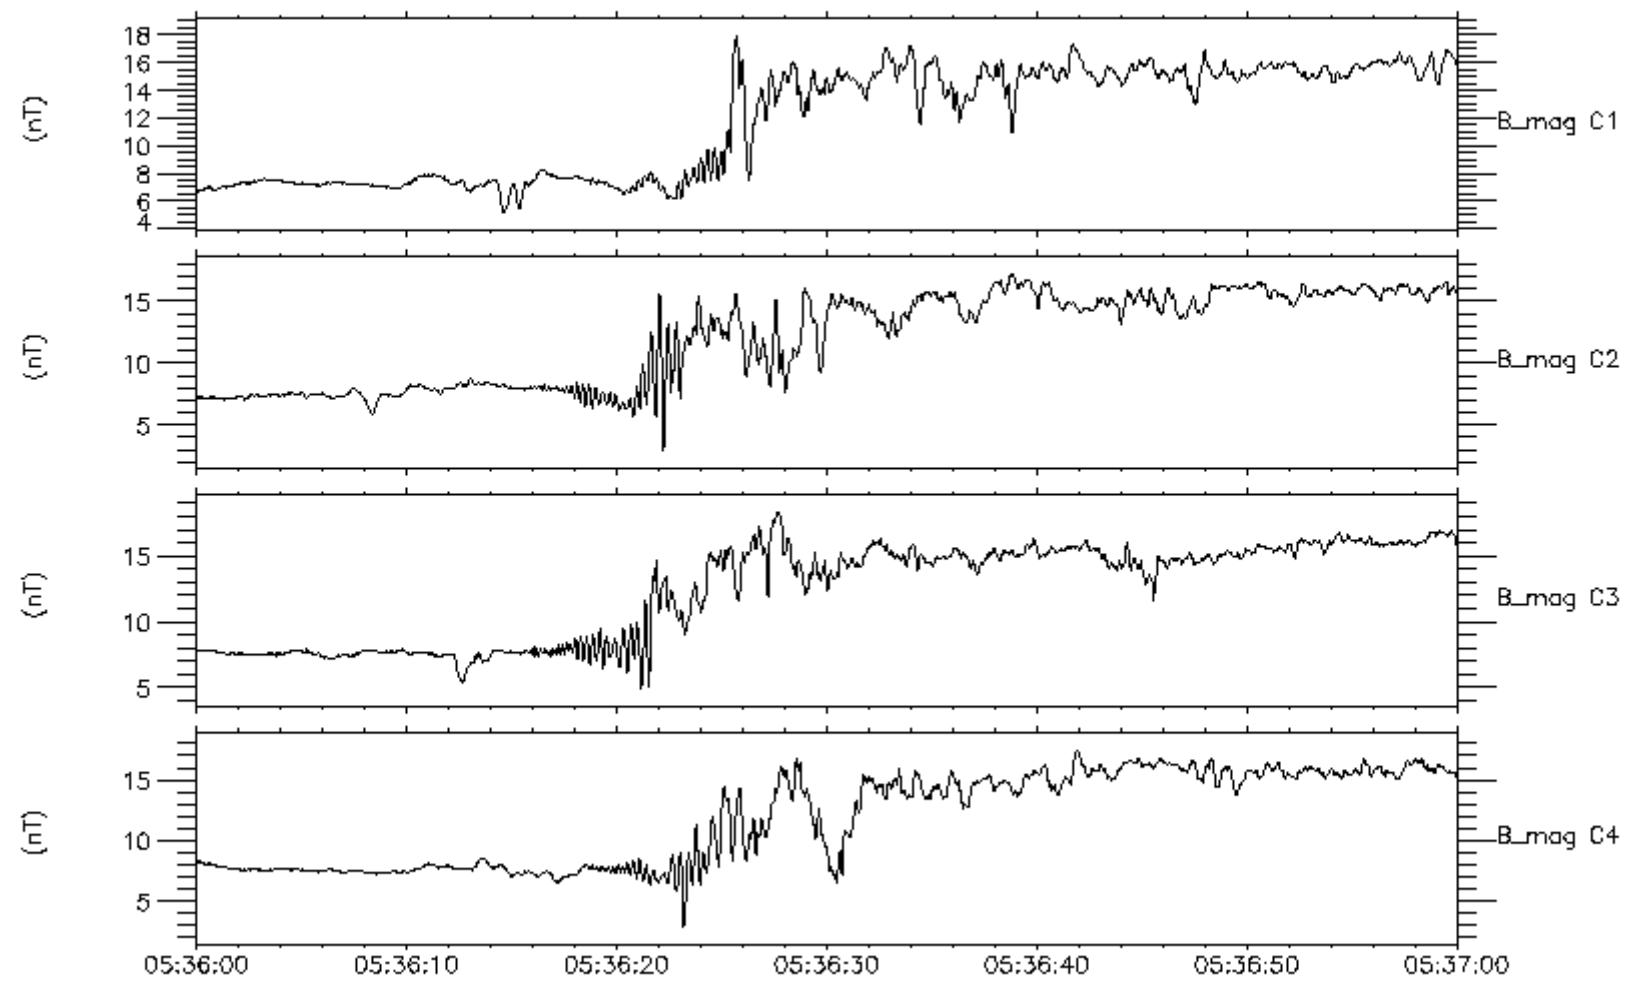

Minimum SC separation 200 km.

2. Study of IP foreshocks.
